SUMMARY

First-year B.Tech CS student at DBIT, Bengaluru. Runner-Up (62 teams) at HackSETU – TATVA Hackathon 2026. Experienced in leading teams and delivering working prototypes in hackathons. Passionate about building real-world solutions and growing through open source and collaboration.

PROJECTS

SafeTurn AI — github.com/nevil06/safeturn-ai 2026
HackSETU – TATVA Hackathon 2026 • 🏆 Runner-Up out of 62 teams

- Real-time traffic safety system using computer vision (OpenCV) to detect pedestrians and dynamically control signals.
- Supported single & dual camera setups with an emergency alert feature; led team from ideation to final demo.

Mr. Bunk Manager — github.com/nevil06/mr-bunk-manager Completed
Personal / Team Project

- AI-driven attendance & timetable app helping students track attendance with minimal manual effort.
- Led the team, distributed tasks, and handled testing and debugging throughout the project.

context-memo — github.com/nevil06/context-memo Ongoing
Open Source CLI Tool

- CLI tool that gives AI coding assistants persistent project memory — scans the codebase and generates a structured memory file.
- Eliminates the need to re-explain the codebase to AI agents, reducing token usage and saving development time.

TECHNICAL SKILLS

Languages: C++, Java, Python, C, JavaScript (basic)
Web & Tools: HTML, CSS, Git, GitHub, VS Code, Docker (basic), OpenCV (basics)
Database: SQL (basic)
Certifications: Intro to Model Context Protocol • Problem Solving (Basic) – HackerRank

ACHIEVEMENTS

- Runner-Up (62 teams) at HackSETU – TATVA Hackathon 2026 for SafeTurn AI — real-time pedestrian detection & signal control.
- Led teams across multiple hackathons (HackSETU, Xcelerate, CODE RED 3.0, Cloud Pirates 2025), delivering prototypes under time pressure.
